Chithra S

Bangalore, Karnataka +91 7019493789 chithraacharyaa18@gmail.com
Chithra-S-Acharya **Chithras18**

Professional Summary

Computer Science Engineering graduate with hands-on experience in **Python, Java, SQL, REST APIs, and software development**. Experienced in Flask applications, API integration, and AI/ML projects. Completed an Android Developer internship and co-authored an IEEE conference paper on image forgery detection. Strong foundation in **OOP, DBMS, SDLC, testing, and debugging**.

Education

S J B Institute of Technology 2023 – 2026
Bachelor of Engineering in Computer Science and Engineering CGPA: **8.0/10**

Government Polytechnic for Women, Bengaluru 2023
Diploma in Civil Engineering

Technical Skills

Programming: Python, Java, C, SQL, JavaScript
Web Development: HTML, CSS, Flask, REST APIs, API Integration, Backend Development
Databases: MySQL, JDBC, Firebase Realtime Database, NoSQL
Software Engineering: OOP, Data Structures & Algorithms, DBMS, SDLC, Software Testing, Debugging, Problem Solving, Agile Methodology
AI & Data: Machine Learning, Deep Learning, NLP, Generative AI, Data Preprocessing, Model Evaluation, Scikit-learn, Pandas
Tools & Technologies: Git, GitHub, VS Code, Linux, Docker (Basic), Jenkins (Academic), AWS (Basic), CI/CD Fundamentals

Experience

MindMatrix Jan 2026 – Jul 2026
Android Developer Intern

GitHub Repository

- Developed **Raksha Kavach – Worker Safety Auditor** using Java, Kotlin, Firebase Authentication, and Firebase Realtime Database.
- Implemented application components, CRUD operations, authentication, and real-time data synchronization.
- Performed testing, debugging, troubleshooting, and issue resolution using Git and Agile practices throughout the SDLC.

Projects

Hybrid Image Forgery Detection System *Python, TensorFlow, Keras, PyTorch, Flask*

- Developed an AI-based application for **image forgery detection and localization** using a hybrid ELA and U-Net architecture.
- Trained and evaluated the model using CASIA v2.0, CISDE, CoMoFoD, and MICC-F220 datasets, achieving **95.17% accuracy** and **0.9906 ROC-AUC**.
- Integrated the trained model with a **Flask backend** for image preprocessing, inference, and real-time testing; co-authored an **IEEE Conference paper**.

AI HR Assistant *Python, Flask, Google Gemini API, Generative AI*

- Developed an AI-powered application using the **Google Gemini API** to process user queries and generate contextual responses.
- Built Flask backend services for **API integration, request processing, and application workflow management**.
- Tested application workflows and AI responses to identify and troubleshoot issues and improve reliability.

Certifications

- **Introduction to Databases and SQL Querying** – IBM SkillsBuild 2026
- **Artificial Intelligence Fundamentals** – IBM SkillsBuild 2026
- **The Complete Full-Stack Web Development Bootcamp** – Udemy (Dr. Angela Yu) 2025
- **Advanced Java Certification** – Ethnotech Academy 2024
