Chithras18

Professional Summary

Computer Science Engineering graduate with hands-on experience in **Python, Machine Learning, Deep Learning, NLP, and AI application development** through academic projects and internships. Experienced with **TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, Matplotlib, BERT, Flask, and Google Gemini API**. Strong foundation in data preprocessing, model evaluation, backend development, problem-solving, and developing AI-based solutions.

Education

S J B Institute of Technology

2023 – 2026

Bachelor of Engineering in Computer Science and Engineering

CGPA: **8.0/10**

Government Polytechnic for Women, Bengaluru

2023

Diploma in Civil Engineering

Technical Skills

Programming: Python, Java, SQL, JavaScript

AI/ML & Deep Learning: Machine Learning, Deep Learning, NLP, BERT, CNN, ResNet-50, U-Net, Generative AI, Image Processing

AI/ML Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, Matplotlib

Backend & APIs: Flask, REST APIs, Backend Development

Databases: MySQL, JDBC, Firebase Realtime Database, NoSQL

Core: OOP, Data Structures & Algorithms, DBMS, SDLC, Data Preprocessing, Model Evaluation, Problem Solving

Cloud & Tools: AWS (Basic), Git, GitHub, Linux, VS Code, Docker (Basic), Jenkins (Academic)

Experience

MindMatrix

Jan 2026 – Jul 2026

Android Developer Intern

GitHub Repository

- Developed **Raksha Kavach – Worker Safety Auditor** using Java, Kotlin, Firebase Authentication, and Firebase Realtime Database.
- Implemented application modules, CRUD operations, authentication, and real-time data synchronization.
- Performed testing, debugging, troubleshooting, and collaborated using **Git and Agile practices** throughout the SDLC.

Projects

Hybrid Image Forgery Detection System

Python, TensorFlow, Keras, PyTorch, Flask

- Developed an **AI-based image forgery detection and localization** system using Deep Learning and image processing techniques.
- Implemented and evaluated **ResNet-50 and U-Net** using TensorFlow, Keras, and PyTorch with multiple public datasets, achieving **95.33% accuracy**.
- Integrated the trained models with a **Flask backend and REST APIs** for preprocessing, inference, and result handling; co-authored an **IEEE Conference paper**.

Text Emotion Detection

Python, BERT, Scikit-learn, Pandas, Matplotlib

- Developed an NLP-based emotion classification system using **BERT** for contextual text representation and prediction.
- Performed **data preprocessing and analysis using Pandas and Scikit-learn**, with Matplotlib for visualization and evaluation.
- Evaluated model performance and analyzed classification results to improve prediction effectiveness.

AI HR Assistant

Python, Flask, Google Gemini API, Generative AI

- Developed an AI-powered HR assistant using **Google Gemini API** to process user queries and generate contextual responses.
- Built a **Flask-based backend** for AI integration, request processing, and application workflow management.
- Developed a working AI solution prototype using prompt-based interaction and evaluated responses for application use cases.

Certifications

- **The Complete Full-Stack Web Development Bootcamp** – Udemy (Dr. Angela Yu) — HTML, CSS, JavaScript, Node.js, Express.js, SQL, REST APIs, Git 2025
- **Advanced Java Certification** – Ethnotech Academy — Core Java, OOP, Collections, JDBC, Exception Handling 2024
